

Trade Readiness Copilot - Go Live Input Requests

Status: waiting_for_real_inputs_not_ready_yet

What this is

This is the short collection list for real people. Once these answers are received and saved, the same script can say whether go live is ready for the exact approved scope.

Current state

- Public launch ready: False
- Ready inputs received: 0 of 8
- Missing inputs: 8

How to use this

1. Send the reviewer brief PDF first.
2. Ask each person to answer only their area.
3. Save each response in external_inputs/ using the matching JSON template.
4. Rerun scripts/run_external_validation_requirements.py --input-dir external_inputs.
5. Use the go-live readiness report to see whether launch is ready or what is still missing.

Inputs to collect

Outside Expert Review

Who to ask: Product, security, privacy/legal, AI safety, operations, trade, and payment reviewers as relevant.

Question: Have the right outside reviewers checked the right scope?

Ready answer: Ready for my area

Minimum input needed:

- reviewer name
- reviewed scope
- decision
- top issues
- missing evidence
- signed date

Legal, Privacy, And Security

Who to ask: Privacy/legal reviewer plus application security reviewer.

Question: Is customer data handling, security, AI use, retention, deletion, and incident handling acceptable for the launch scope?

Ready answer: Ready for my area

Minimum input needed:

- reviewer name
- data/privacy scope
- security scope
- decision
- missing evidence
- signed date

Customs And Trade Language

Who to ask: Licensed customs broker or qualified trade/compliance reviewer.

Question: Does the product avoid unsupported customs, tariff, CFIA, sanctions, and trade-readiness claims?

Ready answer: Ready for my area or not applicable for this launch

Minimum input needed:

- reviewer name

- country/product scope
- approved wording
- wording to avoid
- decision
- signed date

Hosted Staging Or Production

Who to ask: DevOps, SRE, or operations owner.

Question: Is there real hosted evidence for the launch scope, not only localhost?

Ready answer: Ready for my area

Minimum input needed:

- environment URL
- commit/build
- smoke result
- monitoring
- rollback owner
- decision
- signed date

Payments

Who to ask: Billing/payment owner, tax/accounting advisor if needed, and support owner.

Question: Are live checkout, webhook, tax/refund/support, and billing wording ready, or is payment intentionally off for launch?

Ready answer: Ready for my area or not applicable for this launch

Minimum input needed:

- payment scope
- Stripe mode
- webhook evidence
- refund/support owner
- decision
- signed date

Real User Feedback

Who to ask: Product/UX owner or user research owner.

Question: Have real target users used the product and understood what is and is not approved?

Ready answer: Ready for my area

Minimum input needed:

- participant count
- segments
- task results
- top issues
- what changed
- decision
- signed date

Buyer Or Supplier Validation

Who to ask: Founder or commercial validation owner.

Question: Have real buyers, suppliers, importers, exporters, or advisors validated the problem and workflow?

Ready answer: Ready for my area or not applicable for this launch

Minimum input needed:

- counterparty type
- problem validated

- evidence summary
- permission scope
- decision
- signed date

Final Go Live Decision

Who to ask: Named launch owner.

Question: After all other inputs are in, is this launch approved for the exact stated scope?

Ready answer: Go for public launch

Minimum input needed:

- launch scope
- production URL
- remaining risks
- support owner
- rollback owner
- decision
- signed date
