

Go Live Input Requests

A short collection list for the real approvals and evidence needed before go live. Once these answers are received, save them and rerun the input check.

Current question	Answer
Public launch ready now?	False
Ready inputs received	0 of 8
Missing inputs	8
Next step	Collect the missing real-person inputs, save them under external_inputs/, and rerun this script.

Inputs To Collect

Area	Who to ask	Question
Outside Expert Review	Product, security, privacy/legal, AI safety, operations, trade, and payment reviewers as relevant.	Have the right outside reviewers checked the right scope?
Legal, Privacy, And Security	Privacy/legal reviewer plus application security reviewer.	Is customer data handling, security, AI use, retention, deletion, and incident handling acceptable for the launch scope?
Customs And Trade Language	Licensed customs broker or qualified trade/compliance reviewer.	Does the product avoid unsupported customs, tariff, CFIA, sanctions, and trade-readiness claims?
Hosted Staging Or Production	DevOps, SRE, or operations owner.	Is there real hosted evidence for the launch scope, not only localhost?
Payments	Billing/payment owner, tax/accounting advisor if needed, and support owner.	Are live checkout, webhook, tax/refund/support, and billing wording ready, or is payment intentionally off for launch?
Real User Feedback	Product/UX owner or user research owner.	Have real target users used the product and understood what is and is not approved?
Buyer Or Supplier Validation	Founder or commercial validation owner.	Have real buyers, suppliers, importers, exporters, or advisors validated the problem and workflow?
Final Go Live Decision	Named launch owner.	After all other inputs are in, is this launch approved for the exact stated scope?

How To Use Returned Inputs

Save each response as one JSON file in external_inputs/.

Run: `python3 scripts/run_external_validation_requirements.py --input-dir external_inputs`

Open `system_review_graph/go_live_input_readiness_report.json` for the launch decision state.
